Instructor:

Engr. Maria Rizette H. Sayo

December 13, 2025

I. Objectives

In this section, the goals in this laboratory are:

- To describe the project objective and its entire features
- To enumerate the project's rationale and its relevant to your field of discipline

II. Methods

The development team identified essential project deliverables that the customer expects to see during the development cycle. These include:

- **Functional Demonstrations:** Showcasing the booking system, calendar integration, and automated reminder system.
- **Subsystem Accuracy:** Ensuring the payment tracking system accurately processes Cash and GCash transactions.
- **Performance and Security:** Implementing a secure login/signup process for clients and an administrative dashboard for business analytics.

III. Results

The project is visualized as a mobile-friendly platform with a minimalist design aesthetic.

Project Requirements and Data Insights:

- **Services and Pricing:** The system will host a dedicated page for services like Gel overlays (₱199), BIAB (₱299), and Soft gel extensions (₱499).
- **Client Management:** Features include allergy tracking, preferred nail design uploads, and the ability for clients to manage their own rebooking and reminders.
- **Administrative Controls:** The admin can limit capacity to three clients per day, manually set available dates, and upload watermarked photos to a gallery.
- **Visual Identity:** The user interface will support both dark and light modes using a palette of navy blue, light blue, and neutral tones.

IV. Conclusion

This report summarizes the design rationale for a nail salon management system. By integrating specific client requirements such as automated payment tracking and a mobile-responsive UI the system serves as a comprehensive solution for microbusiness owners to manage their operations efficiently.
